How to enable Compatibility Mode

November 2013

Listed below are instructions on how to enable Compatibility Mode so your computer can recognize multiple versions of Internet Explorer.

Open the webpage in Internet Explorer, and then click **Compatibility View** on the **Tools** menu. If you do not see the **Tools** menu, press ALT.

In the **Compatibility View Settings** windows, type the address of the webpage, and then click **Add** Then **Close**. The page should automatically refresh.
